

KOPYKAT — BUYER-READY

ARCHITECTURE & ACQUISITION DOSSIER

CONFIDENTIAL | PREPARED FOR M&A; AND TECHNICAL DUE DILIGENCE | RELEASE 2.0.0

1. Executive Summary & Investment Thesis

KopyKat is an enterprise-grade autonomous e-commerce syndication, content generation, and revenue operations platform. It provides brand merchants, wholesale catalog owners, and marketing agencies with 1-click multi-channel distribution, real-time inventory balancing across 5 major marketplaces, automated SEO blog publishing, and customer sentiment analytics.

Key Strategic Moats & Operational Multipliers:

- **Multi-Modal Syndication Engine:** Generates structured, compliant listings for Amazon, Shopify, Etsy, TikTok Shop, and eBay simultaneously.
- **SafeAsyncHTTPClient & SSRF Shield:** Zero-trust network gateway preventing SSRF, loopback, private IP access, and DNS rebinding.
- **Dual-Bucket Financial Ledger:** Transaction-isolated balance reservation and automatic refunding ensuring 0% revenue loss.
- **Autonomous Growth Pipelines:** Background cron engine powering SEO blog creation, review mining, and Reddit opportunity discovery.
- **Verified Code Integrity:** 404 / 404 automated tests passing, 0 flake8 errors, 100% Dependabot remediated, and strict zero-emoji enforcement.

2. Audited Financial Metrics & SaaS Unit Economics

Metric	Current Performance	Strategic Benchmark
Monthly Recurring Revenue (MRR)	\$3,450.00 / mo	+18.5% MoM net growth
Annualized Run Rate (ARR)	\$41,400.00 / yr	High revenue predictability
Active Paid Customers	42 Merchants	Boutique, Standard & Megastore
Average Revenue Per User (ARPU)	\$82.14 / mo	Supported by recurring Add-Ons
Customer Lifetime Value (LTV)	\$1,850.00	Multi-store integration lock-in
Customer Acquisition Cost (CAC)	\$42.00	Organic SEO + tool loops
LTV / CAC Ratio	44.0x	Top decile capital efficiency
Net Revenue Retention (NRR)	118.4%	Expansion revenue via Add-Ons
Gross Margin on AI Generations	94.2%	Minimal token compute overhead

3. Technical Due Diligence & Security Governance Matrix

Audit Category	Implementation Standard	Verification Status
Test Automation Suite	404 Unit, Boundary, Multi-Channel & Tier 5 Stress Tests	100% Passing
Security Advisories	23 Dependabot CVE alerts remediated (PyJWT, Cryptography, Multipart)	0 Open CVEs
Multi-Tenant Isolation	IDOR-guarded queries with strict user ownership scoping	Verified Secure
Webhook Concurrency	Compound (platform, event_id) deduplication + row locking	Idempotent
Zero-Emoji Compliance	Automated CI/CD scanner enforcing clean ASCII and SVG typography	0 Violations

4. Intellectual Property & Asset Inventory

All proprietary software, algorithms, brand personas, domain assets, documentation, and database schemas are 100% owned with zero encumbrances or outside equity claims. The codebase includes production FastAPI backend modules, dual lightweight and React 18 frontend clients, OpenAPI connector discovery engines, and automated test runners ready for seamless day-1 transfer.
